Dear Karenza,

We would be more than happy for some of our children to design some posters. I will share this with the team and will get back to you once we have some designs in place.

Best wishes,

Jake Imrie

Turn your car off Exhaust Fumes Harm sign (channelling for post mounting)

SSP No: 16459

RRP £26.50 (£31.80 inc vat)

NOW £19.90 (£23.88 inc vat)

Description

Specially designed for us by local schoolgirl, Lola Ewens, these signs are specifically designed to help you reduce emissions from parked cars.

Exposure to particles from petrol and diesel emissions can affect both the lungs and the heart. Long-term exposure to particulate pollution can result in significant health problems including increased respiratory symptoms, such as irritation of the airways, coughing or difficulty breathing. Longer term this could lead to decreased lung function and worse.

Delivery: Although these are made to order, this sign is usually dispatched within 24 hours, meaning you will have to wait no more than two working days to receive it.

Size: 300x400mm

Material: This sign is made from hardwearing aluminium composite (often referred to as Dibond). Utilising two thin sheets of aluminium sandwiching plastic, this sign has no scrap value whatsoever. As such, it should not attract the attention of thieves.
