

## Agenda item 14bii – recommendation for construction of bug hotels

**Bug hotels:** To approve the budget for materials and agree the recommended locations for two x bug hotels, to be constructed as a community project led by Robbie Ryder.

All the materials for two bug  hotels like the ones you sent me, it will cost around £300.00 for materials and of course all the cost of construction will be free of charge as it's a community project.

Where the children come in is collecting materials to put in them before we put on the chicken wire to protect everything that they put in.

All the materials are tanglewood so these snug hotels will last 10/15 years they will also be anchored to the ground by a concrete footing.

I hope this help please let me have yours and the council's thoughts.
