Roundabout quotations

Company	Equipment	Installation	Total Equip & installation costs	Wetpour	Waste Removal & Drainage	Site Security / Storage / Welfare Facilities	Leadtime (order to install)	Carriage charge	Final Inspection	Discount	Total Cost ex VAT	Location	Comments
Rhino	-	-									£11,570.00	Newton Abbot	Asked to bear in mind that when 2 areas of wet pour are joined then this join can never be guaranteed, splits between the 2 surfaces will always occur. No company will guarantee this as it's a naturally occurring event. Quote valid until 06 Dec 2022. The roundabout has central bearings. 'We've seen before with the wheel types that they often seize & become silted up.'
							Breakdown not provided						
TK Play	£7,400.00	£1,845.00	£9,245.00	£1,580.00	£1,293.00	£1,260.00	5-6 weeks	£980.00			£14,358.00	Torrington	Allowed for a small Soakaway to help keep the water away from any moving parts ,and also confirm this is the upgraded Kompan roundabout (with wheels)
Wicksteed	£7,392.00	£1,492.00	£8,884.00	£3,871.00	£1,192.55	£1,748.60	14 weeks	£443.52			£16,139.67	Kettering	
Mant	£6,590.00	£4,895.00	£11,485.00	£4,895.00	£1,000.00	£1,205.00	10-12 weeks		£550.00		£19,240.00	Near Bath	Stick to original quote. Want to replace whole of wet pur due to potential damage when installing. Roundabout has bearings
Hags	£6,377.00	£1,400.00	£7,777.00	£894.40	£519.00	£920.00	6-8 Weeks	£382.62	£380.00	-£1,823.02	£9,050.00	Egham Surrey	quote is valid until the end of November but I don't think our wetpour contractor would be able to quote for the install of a square metre or so of wetpour as it is too small an area. I also think you could potentially get issues if the new area doesn't bond well with the existing wetpour so for us, we'd recommend relaying the whole area to be on the safe side. Spinmee has a large bearing in the centre with 4 supporting castors on a ring supporting the outer edges of the disc.
Proludic	£5,538.00	£955.50	£6,493.50	£1,500	£625.00	£650.00	10 Weeks	£550.00			£9,818.50	Nottingham	Will honour the pricing until the end of 2022. If a purchase order prior to the end of the year we will honour against the price increases they (and everyone else) will see in the new year providing it is installed before the end of March 2023. The J2409 utilises a sealed bearing which negates the issue of water ingress and requires very little greasing from a maintenance point of view.
